

Entra ID Technical Reference Notes

What is Entra ID?

Cloud-based identity and access management service for M365 and Azure

No OUs, GPOs, no domains or sites - Just users, groups and devices

Administrative Units comparable to OUs for delegated administration

The screenshot shows the Microsoft Entra admin center interface. The left sidebar has a yellow circle highlighting the 'All users' link. The main area displays a list of 40 users. The table has the following columns: Display name, User principal name, User type, On-premises sync, Identities, and Company name. The first few rows of the table are as follows:

Display name	User principal name	User type	On-premises sync	Identities	Company name
Adele Vance	AdeleV@M365x93168372...	Member	No	M365x93168372.onmicrosoft.com	
Alex Wilber	AlexW@M365x93168372...	Member	No	M365x93168372.onmicrosoft.com	
Allan Deyoung	AllanD@M365x93168372...	Member	No	M365x93168372.onmicrosoft.com	
Andy's booking page	Andysbookingpage@M36...	Member	No	M365x93168372.onmicrosoft.com	
Automate Bot	AutomateB@M365x9316...	Member	No	M365x93168372.onmicrosoft.com	
Beverly Crusher	CrusherB@M365x931683...	Member	No	M365x93168372.onmicrosoft.com	
Bianca Pisani	BiancaP@M365x9316837...	Member	No	M365x93168372.onmicrosoft.com	
Bob Jones	JonesB@M365x93168372...	Member	No	M365x93168372.onmicrosoft.com	
Brian Johnson (TAILSPIN)	BrianJ@M365x93168372...	Member	No	M365x93168372.onmicrosoft.com	
Cameron White	CameronW@M365x9316...	Member	No	M365x93168372.onmicrosoft.com	
Christie Cline	ChristieC@M365x931683...	Member	No	M365x93168372.onmicrosoft.com	
Conf Room Adams	Adams@M365x93168372...	Member	No	M365x93168372.onmicrosoft.com	
Conf Room Baker	Baker@M365x93168372...	Member	No	M365x93168372.onmicrosoft.com

Conf Room Hood	Hood@M365x93168372...	Member	No	M365x93168372.onmicrosoft.com	
Conf Room Rainier	Rainier@M365x9316837...	Member	No	M365x93168372.onmicrosoft.com	
Conf Room Stevens	Stevens@M365x9316837...	Member	No	M365x93168372.onmicrosoft.com	

New user - create/invite user - Enter user principle name (typically email) + Display name

Properties:

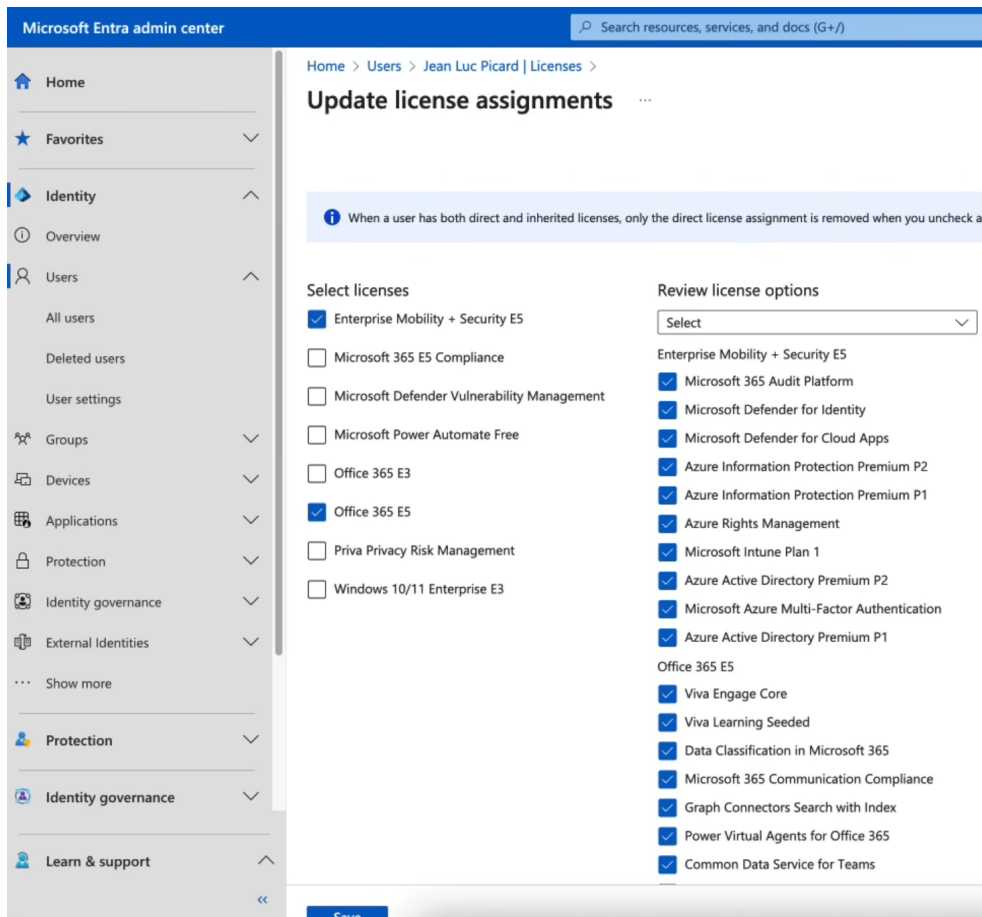

- Identity (F.name/surname, user type, Authorisation info)
- Job Information (title, company name, dept, employment ID, office location, etc)
- Contact Info..

HR integration systems often populate these fields.

Assignments

Add administrative Unit/ Add group/ Add role (eg, Global Administrator)

After selecting the new user, you can assign licences, such as Office E5, which will give the user access to a number of MS features and apps. These can be granularly checked/unchecked.

To delete a user, select the user account by checking the box and clicking delete at the top. The account can be backed up
Deleted users can generally be restored within 30 days

New Group

Group type:

Microsoft 365 (Fully collaborative group)

Group name, email and description

Here an administrative role can be assigned to the group, as with a single user

Sensitivity label (eg, top secret)

Select owner/s who can manage members

****Security group (for permissions)**

Membership Type:

- Assigned: Manually choose users to be added to groups.
- Dynamic User: Choose a property of the user account to add, eg, country/ jobtitle/ department and link it to a value with a selected operator (City = Cape Town), then all users for whom the rule is true will automatically be added to the group. (dynamic membership)

Home > Groups | All groups > New Group >

Dynamic membership rules

Save Discard Got feedback?

Configure Rules Validate Rules (Preview)

You can use the rule builder or rule syntax text box to create or edit a dynamic membership rule. [Learn more](#)

And/Or	Property	Operator	Value
	department	Equals	IT Support
And	city	Equals	Oslo

+ Add expression + Get custom extension properties

Rule syntax

```
(user.department -eq "IT Support") and (user.city -eq "Oslo")
```

- Dynamic Device: Automatically grouping devices based on device properties, with Intune then able to target those groups.

Securing Users

Identity - Overview, properties tab. Scroll down to Security Defaults

Basic security mechanisms in place by Microsoft

NB: Security Defaults and Conditional Access policies are different approaches; enabling Security Defaults can conflict with an existing Conditional Access/security configuration
For new tenants with no existing security configurations, it's good to enable.

Authentication and Authorisation

In EntraID Admin Center, select Protection tab - Authentication methods (List of approved methods, via which, users can authenticate), eg. Passkeys, email & SMS OTP, token, Microsoft Authenticator and certification-based authentication (User requires certificate on device).

"Screenshot 2026-09-07 at 11.47.17.png" could not be found.

Microsoft Authenticator - Users can download on their device. Deploy to selected groups or all users.

Within the Configuration tab, application name and location can be pushed in order to be visible.

☐ Select group

Entra Verifiable Credentials

Decentralised ID (DID) using a third party for verification

In the Entra ID Center, select Verifiable credentials on the left-hand drop-down and select setup. Setup process include:

Define organisation settings

Register decentralised ID

Verify domain ownership

Useful for verifying employee credentials and other information

Eg. accessing a history of monetary transactions - who and where it occurred

Home >

Setup

Setup

Welcome to Entra Verified ID

Verified ID enables fast remote onboarding, more secure access, and easy account recovery with a standards-based solution for individuals and organizations. [Learn more](#)

1 Define organization settings

Confirm your organization's details, key vault, and Azure subscription information to create your organization's Decentralized Identity (DID).

2 Register decentralized ID

Register your DID by uploading your unique DID document that'll allow applications and services to verify your credentials and for you to verify credentials from others.

3 Verify domain ownership

To verify domain ownership, you'll need to upload a unique document that links your DID to the domain you entered in the organization settings.
